ELSEVIER

Comput. Methods Appl. Mech. Engrg. 161 (1998) 397–398

Computer methods in applied mechanics and engineering

Contents Volume 161

Volume 161, Nos. 1–2, 3 August 1998

Large strain deformations of elastic shells. Constitutive modelling and finite element analysis
C. Sansour 1

An object-oriented implementation of structural path-following
A. Olsson 19

An algorithm for gradient-regularized plasticity coupled to damage based on a dual mixed FE-formulation
T. Svedberg and K. Runesson 49

The motion of a fast spinning disc which comes out from the limiting case $\gamma_0'' \approx 0$
A.I. Ismail 67

A posteriori error estimation in large-strain elasticity using equilibrated local Neumann problems
U. Brink and E. Stein 77

Effect of texture on fracture of fibrous materials
V.I. Räisänen and H.J. Herrmann 103

Thermo-mechanical modelling and sensitivity analysis for metal-forming operations
H.J. Antúnez 113

Adaptivity and wrinkle indication in sheet metal-forming
P. Nordlund 127

A flexible automatic hexahedral mesh generation by boundary-fit method
N. Chiba, I. Nishigaki, Y. Yamashita, C. Takizawa and K. Fujishiro 145

Boundary integration of polynomials over an arbitrary linear hexahedron in Euclidean three-dimensional space
H.T. Rathod and S.V. Hiremath 155

Integration of rational functions of bivariate polynomial numerators with linear denominators over a $(-1,1)$ square in a local parametric two-dimensional space
H.T. Rathod and Md. Shafiqul Islam 195

Volume 161, Nos. 3–4, 11 August 1998

A dynamic adaption algorithm for grid, time and satellite processors for nodal finite element formulations of Navier–Stokes equations
S.Ø. Wille and D. Skipitaris 218

A unified finite element formulation for compressible and incompressible flows using augmented conservation variables
S. Mittal and T. Tezduyar 229

A dynamic stochastic finite element method based on dynamic constraint mode
Z. Lei and C. Qiu 245

A high-order pathline Godunov scheme for unsteady one-dimensional equilibrium flows
Y.-H. Tang, S.-T. Lee and J.-Y. Yang 257

Evaluation of fundamental vibration frequency of an orthotropic bending plate by using an iterative approach
Y.Z. Chen 289

An automatic adaptive meshing technique for Delaunay triangulations
X. Xu, C.C. Pain and A.J.H. Goddard 297

Conservative motion of a discrete, hexahedral gyroscope
D. Greenspan 305

A large-strain elastic-plastic finite element analysis of rolling process
J.D. Lee 315

Numerical analysis of junctions between thin shells. Part 1: Continuous problems
M. Bernadou and A. Cubier 349

Numerical analysis of junctions between thin shells. Part 2: Approximation by finite element methods
M. Bernadou and A. Cubier 365
